

26 May '78

Dear Mite Owner,

Recently, a group of California Mooney Mite owners gathered at a Mite Fly-In with the thought that a Mite newsletter would be appropriate as a voice to circulate possible information or interest of value to its subscribers. The newsletter would be for the Western United States and would be published every two or three months or as enough news gathers to be informative. In addition, it can be used as an exchange of useful data to its subscribers carrying some technical data, some sales information, events, anything and everything associated with Mooney Mites.

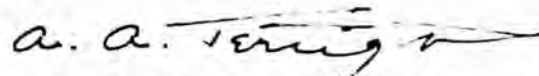

In order that you may be acquainted as to who I am, the following delineates for your benefit. In California, I have been the motivating force to gather together Mooney Mites and their owners on two occasions. Last September, I sponsored a "Mite Fly-In" at Porterville, California which turned out as a great success. Nine "Mighty Mites" showed their stuff that great weekend, plus six other owners flying Cessna 150's and 172's since their Mites were in a state of restoration or repair. The second outing that I sponsored happened a few weeks ago at Apple Valley, California. This event was a "get-together" for 2 days with great gab sessions. Six Mooney Mites displayed their colors with four additional Mite owners flapping rented Cessna 150's. A great time by all followed.

By the way, I am also sponsoring the second annual "Mooney Mite Fly-In" which again shall be held in Porterville, California on 25, 26 and 27 August 1978. At the Apple Valley gathering, after some effort, a name was decided upon for the newsletter -- "WAMM" (Western Association of Mooney Mites).

So, what are your thoughts and would you be interested in such printed matter? If so, drop a line and fill out the form. Cost of the newsletter will be \$2.50 per year! Some 65 Mite owners are in the Western states of which 28 are in California. The remaining 60 or 65 are spread out in the remaining states.

Happy Mite Flying ---  
Keep the Mites in the Air!

Sincerely,

A. A. Terrigno  
Owner of Mites N118C & N120C
